## Information Sheet - Aquaculture

*If you are a veterinarian interested in practising with fish, here is what you need to know about facility accreditation.*

**Farmed Fish** – Veterinarians choosing to practice with farmed/commercial fish will require an accredited food animal mobile.

**Pet Fish** – Veterinarians choosing to practice with pet fish require an accredited companion animal mobile or office or hospital. Note that only those practising from a mobile can advertise in home visits.

**Professional Practice Standards:** Every veterinarian, regardless of scope of practice, is expected to meet the established standards of practice of the profession.
